62. A data warehouse is a database that stores current and historical data. (II) In general, data warehouses not only offer improved information, but they make it easy for decision-makers to obtain it. (III) Although data administration is a very important organizational function, it has proved very challenging to implement. (IV) In fact, they even have the ability to model and remodel data. (V) These systems also enable decision-makers to access data as often as they need, without affecting the processing performance of the operational systems.

- A) ❶ B) ❷ C) ❸ D) ❹ E) ❺

63. Carrier companies have made great strides in recent years with the introduction of simple package tracking services. (II) Now they are racing to use the World Wide Web to gain market share by providing more sophisticated services for their customers. (III) Their web sites can handle package scheduling and pickup from start to finish. (IV) As a result, use of the World Wide Web has enabled companies to create new business ventures which wouldn't otherwise have been feasible. (V) Anyone in a major metropolitan area with a package to ship can use web sites to check delivery routes, calculate shipping charges, and schedule a pickup.

64. I don't believe she is particularly clever, but she has a great deal of charm and people tend to do what she wants.

- A) Though she really is not very intelligent, she has charm and people are always pleased to accept her leadership.
B) She may not be very bright, I personally don't think she is; but she certainly has a winning way with people so they generally act in the way she wants.
C) Her intelligence is no more than average, but she makes up for this with charm, so she can manipulate people easily.
D) It is as much her charm as her intelligence that enables her to make people act in the way she wants them to.
E) She doesn't need to be intelligent as she has the gift of knowing-how to charm people so that they act in the way she wants.

65. I can't understand why we haven't heard from him yet: he must have received the parcel several days ago.

- A) Surely he would have contacted us immediately on receiving the parcel; but it's hardly likely that it hasn't reached him.
B) I'm worried because he still hasn't contacted us could it be that the parcel still hasn't reached him?
C) It's odd that he still hasn't got in touch with us: surely the parcel reached him at least a day or two ago.
D) I was sure he'd get in touch with us about the parcel; could it be that he hasn't received it yet?
E) He really ought to have got in touch with us before this, unless, of course, he still hasn't received the parcel.

66. The last time I talked to him, he told me that the business was doing well; but apparently that's not the case now!

- A) When we last met, the business was doing well or so he said; but I fear that is hardly the case any longer.
B) The account he gave of the business the last time we spoke, was a favourable one, but now I'm not too sure,
C) The last time we met he assured me that all was going well with the business, but I don't know what's happening now.
D) When we last spoke he seemed confident that the business was picking up, but obviously it's not doing so now!
E) When we last spoke together, he said the business was doing fine; but now, it seems, things are rather different.

67. Some scientists think that a meteor impact, that occurred around 65 million years ago, may have caused the extinction of the dinosaurs.

- A) In the opinion of some scientists, the extinction of the dinosaurs could have been the result of the impact of a meteor which occurred roughly 65 million years ago.
B) According to some scientists, the extinction of the dinosaurs was caused by a meteor that struck Earth 657million or so years ago.
C) Some scientists reckon that the impact of a meteor that struck Earth some 65 million years ago need not have caused the extinction of the dinosaurs.
D) These scientists agree that the impact of a meteor over 65 million years ago must have caused the extinction of the dinosaurs.
E) The extinction of the dinosaurs could only have been caused by a meteor impact that occurred some 65 million years ago.

68. The sooner we get the new system into action, the better.

- A) Once the new system is working, the situation will improve.
- B) We should get the new system working as soon as possible.
- C) Sooner or later we'll have to install a new system.
- D) At some future date a new system is going to be necessary.
- E) We are going to get a new system installed without delay.

69. When he asked which one I wanted, I said I didn't mind.

- A) He said I could choose between them, but I said it didn't matter to me.
- B) He said I had to choose, but I didn't want to.
- C) It was up to me to choose between them, but I really didn't want to.
- D) He wanted me to choose for him and I agreed to do so.
- E) I would have done the choosing if they had asked me to.

70. Ronnie:

Someone's got to tell the manager!

James: -----

Ronnie :

I know it's not. But someone has to break the news to him.

James:

Yes. I'm afraid that's true.

- A) Why don't you tell him yourself? You're just as much at fault as I am.
- B) I will. He knows it's not my fault.
- C) I know. But why me? It's not my fault that the virus got into the computer!
- D) But I don't see why it should be me!
- E) Let him find out for himself!

71. Jane:

The sign says "Trespassers will be prosecuted". What does that mean?

Kenneth :

It really means keep off this piece of land.

Jane: -----

Kenneth :

Yes, it can. A landowner has the legal right to keep people off his land.

- A) But who does the land belong to?
- B) Do people take any notice of such an order?
- C) Have people the right to put up such notices?
- D) But can this order be enforced?
- E) Is there ever a court case about it?

72. Andrew:

Where does the money for the Nobel prizes come from?

Paul: -----

Andrew:

That's interesting. And I suppose it means the Nobel prize will continue for ever!

Paul:

Let's hope so!

- A) I don't know. But there's now a prize for economics.
- B) I really don't know. I used to think it was the Swedish National Bank.
- C) Do you know, I'd never thought about it!
- D) The cash awards are quite high, so it's an interesting question.
- E) Mostly from the interest on the Nobel endowment fund.

73. Angela:

Isn't it possible to use the air-conditioner as a heater?

Malcolm:

It certainly is. Are you feeling cold? Shall I turn it on for you?

Angela: -----

Malcolm:

The signs and symbols on the remote control device make it easy to turn on.

- A) I wish you would. That's if you know how to do so.
- B) Yes do. Aren't you feeling cold?
- C) Please do. We can turn it off when the central heating comes on.
- D) It would be nice. I really am feeling cold.
- E) Of course. Now the sun's gone it's getting quite cold.

74. Clare :

My watch has stopped. Can you change the battery for me?

Greg :

I don't think I can. With a small watch like that it's a job for an expert.

Clare: ----

Greg :

No, it isn't. Any shop that sells watches will do the job for you. It only takes a couple of minutes.

- A) I'm quite sure you could if you tried.
- B) The last time it needed changing my father did it for me.
- C) I don't even know if this battery is the right size.
- D) Where will I find an expert? It sounds so complicated!
- E) I don't think it is. You're making it sound a lot more difficult than it is.

75. Seyfi:

By the way, did you watch that film on Napoleon to the end? What happened?

Sait: ----

Seyfi:

What? But I was enjoying it. I thought a little-known portion of his life had been well-researched and sensitively presented!

Sait:

So did I. Until the end of the film!

- A) I don't know. I got bored and turned the TV off.
- B) Oh! The end was a terrible let down. It turned out that there was no historical basis for anything at all!
- C) As you'd expect, it ended with his death; and really, I felt sorry for him.
- D) The trouble is I missed the beginning, and that might have helped me understand the end better.
- E) Throughout the film, excitement was given preference over historical fact.

For two decades after World War II, mass production reigned supreme. Mass-production techniques pushed companies into standardized products, long product life cycles, and rigid manufacturing, emphasizing efficiency and low cost over flexibility. Special orders cost more. But today's consumers are very choosy. They want quality, value and products specially tailored to their needs, but always at the lowest possible price. For now mass customization has come to the fore. Mass customization uses information technology to produce and deliver products and services designed to fit the specifications of individual customers. Companies can customize products in quantities as small as one with the same speed and low cost as mass-production methods. Mass-customization systems use information taken from the customer to control the flow of goods.

76. We learn from the passage that mass production

- A) has now regained its previous popularity
- B) was the leading method of production in the twenty years or so that followed World War II
- C) can easily be adapted to meet the needs of individual customers
- D) can be very profitable because of the wide appeal of its goods
- E) gives priority to quality and longevity in the goods produced but ignores aesthetic qualities

77. We learn from the passage that one of the characteristics of mass production is —.

- A) the need to please every customer
- B) a disregard for flexibility
- C) a disregard for cost-effectiveness
- D) to take into consideration the specifications given by individual customers
- E) the rescheduling of production as the need arises

78. By the phrase "mass customization", as it is used in the passage, is meant the production of goods —.

- A) in very large quantities and for general use
- B) to meet standardized specifications which will please everyone
- C) at high speed regardless of cost
- D) designed to have a long life
- E) designed to meet the specific needs of individual customers

79. According to the passage, present-day customers —.

- A) are encouraged to buy ready-made goods available in the shops
- B) are pleased far more easily than customers were in the past
- C) do not attach much importance to production methods
- D) specify what they want and insist on getting it
- E) rarely distinguish between standardized and non-standardized goods

80. The point is made in the passage that mass customization —.

- A) is no more costly and no more time-consuming than mass production
- B) is a system that dates back to the end of World War II
- C) has actually never been as popular as mass production
- D) is primarily concerned with efficiency but overlooks quality
- E) does not attach much importance to flexibility

Before the Polish-born French-American mathematician Benoit Mandelbrot made his mark on the world, scientists liked to forget about the imperfections and irregularities of nature. The study of perfect squares, triangles and planes had dominated their field for over 2,000 years, since the Greek geometer Euclid wrote maths' oldest treatise Elements and provided us with the tools to measure these flawlessly smooth shapes. A question about how to measure the real shape of a tree, a coastline or anything with a rough edge could not be tackled by Euclidean geometry and had therefore been ignored. But Mandelbrot changed all this when he invented fractal geometry, which enables us to measure roughness. "My whole career has been one long, ardent pursuit of the concept of roughness", he says. The roughness of clusters in the physics of disorder, of turbulent flows, of exotic noises, of chaotic dynamical systems, of the distribution of galaxies, of coastlines, of stock-price charts and of mathematical constructions."

81. It is clear from the passage that, before Mandelbrot's concepts attracted the attention of the scientific world, —.

- A) mathematics followed the lead of Euclid and concentrated on regular shapes
- B) everyone felt that Euclidean geometry was inadequate
- C) scientists relied on Euclidean geometry to measure trees and exotic noises
- D) Mandelbrot almost lost confidence in the concept of roughness
- E) Mandelbrot was careful to limit the scope of his studies into roughness

82. According to the passage, Euclidean geometry can, in a way, be regarded as having had a negative effect upon the development of mathematics because it —.

- A) can be neither substantiated nor disproved
- B) is too involved with measurement
- C) makes the investigation of roughness impossible
- D) is far too comprehensive
- E) put forward the concept of roughness

83. It is clear from the passage that Mandelbrot —.

- A) only began to work on the concept of roughness at a later stage in his career
- B) finds the concept of roughness immensely exciting, and apparent in widely different areas
- C) worked on the concept of roughness because he wanted to prove that Euclid's theories were contradictory
- D) didn't discover fractal geometry but worked to extend its uses
- E) has still to convince the scientific world of the value of fractal geometry

84. One point made in the passage is that Euclidean geometry—.

- A) has led to a better appreciation of the irregularities in nature
- B) has had to be modified in the light of new discoveries
- C) has been shown to be invalid
- D) is not universally applicable
- E) doesn't deserve the respect it has enjoyed for 2,000 years

85. According to the passage, fractal geometry —.

- A) makes possible the measurement of anything with a rough edge
- B) is actually, as regards method, very similar to Euclidean geometry
- C) is merely an extension of Euclidean geometry
- D) is well on the way to replacing Euclidean geometry entirely
- E) is just one of several remarkable innovations propounded by Mandelbrot

Therapists have to be very careful before they make a diagnosis of delusional disorder. A great many complaints are founded on fact. It is possible that a patient is really being harassed at work, that her husband is deceiving her, or that her business partner is cheating her. Indeed, therapists must be careful not to mislabel facts as delusions, a trap known as the Martha Mitchell effect. Martha Mitchell was the wife of former US attorney general John Mitchell. In October 1972, he was accused of having ordered the break-in at the Democratic campaign headquarters in the Watergate Hotel in Washington, D.C. Mrs Mitchell repeatedly told the press that her husband was being made a scapegoat to protect the real culprit - President Richard M. Nixon. The White House spread disinformation about Mrs Mitchell, saying she had a drinking problem and implying that her statements were delusional. When the scandal was ultimately unravelled, Mrs Mitchell's statements were proved true and she was shown to be utterly sane and with no drinking problem.

86. The passage draws attention to the fact that —.

- A) John Mitchell had indeed violated the law on several occasions
- B) it can sometimes be difficult for therapists to distinguish between fact and delusion
- C) President Nixon had never trusted his attorney general
- D) Mrs Mitchell had always been subject to delusions
- E) complaints always have a foundation in fact

87. We understand from the passage that Mrs Mitchell —.

- A) was often treated by therapists on account of her delusions
- B) did indeed have a drinking problem
- C) was indifferent to the disinformation spread by the White House
- D) was unjustly portrayed as suffering from delusions
- E) displayed little interest in the Watergate affair

88. We learn from the passage that, in the Watergate affair, US attorney general John Mitchell —.

- A) was criminally involved in the break-in at the Democratic campaign headquarters
- B) was made to appear as the leading wrongdoer
- C) asked the press to interview his wife
- D) advised President Nixon on the legal procedure
- E) was anxious that his wife should not get involved with the press

89. According to the passage, Mrs Mitchell's statements about her husband —.

- A) were disregarded by the press
- B) were imaginary rather than factual
- C) were, in fact, true but deliberately denied
- D) convinced President Nixon that his attorney general was innocent
- E) were examined by therapists on a regular basis

90. It is clear from the passage that, by "the Martha Mitchell effect" is meant —.

- A) the labelling of facts as delusions
- B) Mrs Mitchell's loyal support of her husband
- C) the use of a wife's evidence against her husband
- D) the unravelling of the Watergate scandal
- E) the giving of false testimony at a trial

91 - 95. soruları aşağıdaki parçaya göre cevaplayınız.

Recent activity in several US church communities has seemed almost unbelievable: churchgoers have gathered around huge fires and cheered as they cast Harry Potter books into the flames. They fear that the incredibly popular series about a school for young wizards is spurring children and adolescents toward a life of witchcraft and onto the dangerous path toward Satanism. For these congregations, J.K. Rowling's books are none other than the work of the devil herself. To most people, however, the Harry Potter books and films are merely compelling adventure stories, not a threat to children's psyches. But what has been forgotten in the excitement of "Pottermania" is that boys and girls have been fascinated by magic and sorcery for generations. Surveys about magical practices among adolescents vary widely, but some indicate that as many as 44 per cent have shown some slight, passing interest in it. Although satanically motivated violence occasionally makes headlines, research shows that less than 5 per cent of young people take part in more extensive witchcraft, and very few end up in the kind of organized devil worship that can lead to such acts as ritual murder.

91. The attitude of the writer of the passage towards the burning of the Harry Potter books by various church communities is - —.

- A) an understanding one, as many young people have been led astray by these books
- B) one of deep anger
- C) sympathetic as basically he believes they are right about the ill-effects of the Harry Potter books
- D) one of amazement at their response
- E) one of repulsion at their hysteria and fanaticism

92. One point emphasized in the passage is that the interest of young people in magic —.

- A) is no more dangerous than their love of adventure
- B) needs to be recognized by society and firm action taken
- C) really is largely due to the Harry Potter stories
- D) is by no means a new development
- E) should be encouraged as it is perfectly harmless

93. According to the passage, though a fair number of young people have felt a vague, temporary interest in magic, —.

- A) it has always been easy to convince them of its dangers
- B) few have become seriously involved
- C) they have never, in any way, been harmed by it
- D) most do not even know the meaning of Satanism
- E) this never continues into adolescence

94. In the passage, though the writer does not want to make a big issue of the matter of witchcraft, he ---- .

- A) would like more surveys and studies to be carried out on it
- B) feels it should receive more public attention
- C) admits that it can, on occasion, lead to terrible events
- D) hopes that "Pottermania" will soon die out of its own accord
- E) believes that all cases of satanically motivated violence should make the headlines and so serve as warnings

95. According to the passage, those who burn the Harry Potter books —.

- A) have previously burned other popular books
- B) are actually indulging in a form of witchcraft themselves
- C) mostly do so without having first read the books
- D) are being accused, quite unfairly, of displaying extremist attitudes
- E) do so because they believe these books encourage young people to turn to witchcraft

Why does sea water taste salty? It is a question that has been asked by countless people down the ages. And the answer seems straightforward: rain constantly erodes the surface of the Earth, washing a mix of natural chemicals into rivers and thence into the sea. The most water-soluble and abundant of these just happen to taste salty. All very simple. Or is it? After all, erosion has been taking place for millions of years, dumping ever more of these salty compounds into the sea, yet the concentration is still far below the saturation level. So the real mystery is not why the sea tastes salty, but why it isn't utterly packed with salt, and as lifeless as the Dead Sea. Here is another curious thing about our planet. Its atmosphere has existed for billions of years, and yet it still contains a mix of highly reactive gases like oxygen and methane. Why haven't they settled down into a boring unreactive atmosphere like that of Mars or Venus?

96. According to the passage, the most important and fascinating question about salt and the sea is: —?

- A) why do certain natural elements taste salty?
- B) how much salt is there in the sea
- C) how does the salt get to the sea
- D) when will the salt in the sea reach saturation level
- E) why isn't the sea more salty

97. One point made in the passage is that unanswered questions about the world and the universe —.

- A) will, at some point in the future, be answered in a satisfactory manner
- B) are now very few in number
- C) are unimportant and can be ignored
- D) help to highlight the mysteries of the world
- E) are only of interest to scientists

98. One aim of the writer in this passage is to make people realize that — .

- A) it is dangerous to interfere with the balance of nature
- B) everything in the universe has an explanation
- C) many of the facts about various planets are exceedingly boring
- D) all the seas in the world will eventually be like the Dead Sea
- E) what may seem simple and straightforward may actually not be so

99. It is clear from the passage that writer often wonders about why —.

- A) certain gases are not highly reactive
- B) there is no end to the chemicals that are carried into the sea
- C) the world is as it is
- D) people are not attracted to the Dead Sea
- E) the atmosphere of Mars is similar to that of Venus

100. The phrase "just happen to" supports the writer's view of the world as a place — .

- A) where many phenomena remain inexplicable
- B) where everything goes according to a master plan
- C) where most occurrences have a logical explanation
- D) of continuous and relentless change
- E) of little interest to anyone who is interested in science
